INSTRUCTIONS

Thank you for your purchase of David Weeks Studio lighting. We use only the highest quality UL-compliant components from the USA and Europe. Each lamp is handcrafted and assembled in our Brooklyn, NY shop. We make every effort to produce our lights to the highest standards.

Warranty

David Weeks Studio (DWS) will guarantee its products to be free from defects in workmanship for a period of five (5) years from date of shipment. Parts and materials are guaranteed to be free of defects for one (1) year from date of shipment. During this warranty period, DWS will repair or replace, at its option, free of charge, products or parts that are proven to be defective. This warranty does not apply to damages resulting from accident, abuse, alteration, tampering, misuse, mishandling, or negligence. Defective products will be replaced within the normal production time period required to reorder and manufacture the same product.

Transportation of fixtures in need of repair will be the responsibility of buyer. Handling of fixtures in transport will be the responsibility of buyer. DWS will not be held responsible for damages which occur during installation, or by transportation after the initial packing material is removed. DWS will not be responsible for any products subjected to inappropriate application or fixtures installed or modified in any way that is not in accordance with DWS instructions. Any modification of fixtures absolves DWS of any liability and voids warranty.

Care & Cleaning

David Weeks Studio products are crafted by hand at our studio in Brooklyn, NY. While we take the greatest care in the handling and manufacturing of our products, subtle variances and irregularities in finish and color are inherent in the production process and should not be considered as defects.

Many metal finishes are applied by hand and may vary in color, tone and character. While DWS will make every effort to match a finish, no guarantee can be made of an exact match. We do not guarantee finishes against fading and oxidizing. Regular polishing is recommended. Arms, hardware and shades can be cleaned with a mild, non-ammonia-based spray cleaner or soft cloth to remove fingerprints or dust. Check to ensure that chosen cleaner is safe for your particular finish; if unsure, we recommend testing a small hidden area for reaction.

Lamping

Please consult included directions to determine the type of bulb required. These fixtures are balanced with a specified bulb, and only one style of bulb is used with each fixture. Using an unspecified style of bulb, or mixing different types of bulbs, could inhibit fixture's ability to balance or function safely. It is imperative that suggested wattage is adhered to. Any damage caused to the fixture due to higher than recommended watt bulb, or due to non-recommended bulb, will void warranty.

Treble Standing

No 318

1. This Install requires two people. Remove wrapping attaching the arm and base to the wooden support carefully.
2. Person A and B support fixture in designated areas shown above. Remove fixture from support by gently sliding it out.
3. Remove bubble wrap and paper from arm. DO NOT use razor blade to open.
4. Remove shade from box. Keep the bubble wrap located between the acrylic inside the shade until install is completed.
5. Orient the shade post so that the set screw holes are aligned then gently insert the bottom post into the top post. Once holes are aligned, secure the set screw using an Allen Key so that it is flush.
6. Once shade post is attached, connect the female and male quick connect wires. Slide the excess wire and connection point into the shade bottom post hole until you can no longer see the connection point. See diagram above.
7. Once shade is secured, carefully remove bubble wrap located between the acrylic inside shade. DO NOT use razor blade to open bubble wrap; shade scratches easily.
8. Acrylic diffuser in shade may move during travel. To put the diffuser back in place, gently shift glass so that it falls into the lip of the heat sink. Be careful of LED board.

Care Instructions

- Arms, hardware and shades can be cleaned with any mild spray cleaner or soft cloth to remove fingerprints or dust.

Important!

- Fixtures are designed for normal climate conditions.
- Lighting is for use in dry locations and indoor environments.

Lamping

- LED: Warm white 2700K
- Lumens: 825 (equivalent to one 60W incandescent bulb)
- CRI: 80+
54,000 LED life hours (approx.)
