INSTRUCTIONS

Thank you for your purchase of David Weeks Studio lighting. We use only the highest quality UL-compliant components from the USA and Europe. Each lamp is handcrafted and assembled in our Brooklyn, NY shop. We make every effort to produce our lights to the highest standards.

Warranty
David Weeks Studio (DWS) will guarantee its products to be free from defects in workmanship for a period of five (5) years from date of shipment. Parts and materials are guaranteed to be free of defects for one (1) year from date of shipment. During this warranty period, DWS will repair or replace, at its option, free of charge, products or parts that are proven to be defective. This warranty does not apply to damages resulting from accident, abuse, alteration, tampering, misuse, mishandling, or negligence. Defective products will be replaced within the normal production time period required to reorder and manufacture the same product.

Transportation of fixtures in need of repair will be the responsibility of buyer. Handling of fixtures in transport will be the responsibility of buyer. DWS will not be held responsible for damages which occur during installation, or by transportation after the initial packing material is removed. DWS will not be responsible for any products subjected to inappropriate application or fixtures installed or modified in any way that is not in accordance with DWS instructions. Any modification of fixtures absolves DWS of any liability and voids warranty.

Care & Cleaning
David Weeks Studio products are crafted by hand at our studio in Brooklyn, NY. While we take the greatest care in the handling and manufacturing of our products, subtle variances and irregularities in finish and color are inherent in the production process and should not be considered as defects.

Many metal finishes are applied by hand and may vary in color, tone and character. While DWS will make every effort to match a finish, no guarantee can be made of an exact match. We do not guarantee finishes against fading and oxidizing. Regular polishing is recommended. Arms, hardware and shades can be cleaned with a mild, non-ammonia-based spray cleaner or soft cloth to remove fingerprints or dust. Check to ensure that chosen cleaner is safe for your particular finish; if unsure, we recommend testing a small hidden area for reaction.

OTTO Loop Pendant

No 438

- All fixtures are built for standard 4" U.S. J-box.
- Two people are needed for installation.
- Fixtures weigh 5 lbs. Make sure location has adequate support; additional weight support recommended for junction box installation.
- Leave wrap on shades until installation is complete. DO NOT use razor blade to open bubble wrap; shades scratch easily.
- Turn off circuit breaker connected to junction box (J-box) where fixture is being installed.
- Fixture canopy is shipped assembled. Loosen the set screw on the slip ring under the canopy cover and move the canopy cover down the drop.
- Lift entire fixture to J-box, and attach ceiling mount to J-box. The fixture can rotate 320° from the canopy, be sure that the fixture will be able to face the desired direction.
- Pull the wires from the J-box into the canopy through the opening for easier access while wiring. Do not disconnect the wires that attach the fixture to the power supply.
- Connect each wire to its corresponding wire: live to live, neutral to neutral, and ground to ground. Use wire nuts to secure wires, and wrap the connection in electrical tape. DO NOT disconnect the red, black, and purple wires from the power source to the fixture. DO NOT wire directly, must use suggested power supply.
- Once all wires are connected, push them gently back into the J-box through the opening in the ceiling mount.
- Slide the canopy cover and slip ring back up and secure in place by tightening the set screw.
- Remove bubble wrap from shades.
- Adjust shades to your needs. When adjusting shades, do not attempt to force swivels past natural stopping point.

Care Instructions

- Arms, hardware and shades can be cleaned with any mild spray cleaner or soft cloth to remove fingerprints or dust.

Important!

- Before installation ensure power supply is disconnected at fuse box.
- Fixtures are designed for normal climate conditions.
- Lighting is for use in dry locations and indoor environments.
- This lamp must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

Electrical Wires

- Live = Black (US) Brown (EU)
- Neutral = White (US) Blue (EU)
- Ground/Earth = Copper/Green (US) Green & Yellow Striped (EU)

Lamping

- Integrated LED source

Power Supply

- For 120V areas: included in canopy
- For 220-240V areas: remote power supply only. Not included. To be sourced locally per specification on product data sheet.**
- DO NOT wire directly without remote power supply.**
